Test Single Question

Enter your question:

What is the cumulative bonus structure in this policy?

Ground truth answer (for comparison):

The policy provides 10% cumulative bonus of the Annual Sum Insured at the end of each claim-free policy year, with maximum accumulation up to 100% of the Annual Sum Insured

Evaluate

Question

What is the cumulative bonus structure in this policy?

Ground Truth

The policy provides 10% cumulative bonus of the Annual Sum Insured at the end of each claim-free

RAG Answer

The policy provides a Cumulative Bonus of 10% of the Annual Sum Insured at the end of each claim-free policy year if the policy is continuously renewed [Source 1]. The maximum Cumulative Bonus accumulation is 100% of the Annual Sum Insured [Source 1]. For floater policies, the cumulative bonus is on a floater basis and accrues only if no claims have been made for all insured persons during the policy period [Source 1, Source

policy year, with maximum accumulation up to 100% of the Annual Sum Insured

4]. The cumulative bonus is available only to insured persons who were insured in previous policy years and continue to be insured [Source 4]. The Cumulative Bonus will not be added if the Policy is not renewed with Us by the end of the Grace Period [Source 4]. Cumulative bonus can be utilised only when the Annual Sum Insured is completely exhausted [Source 4]. If the Policy Period is two or three years, any Cumulative Bonus that has accrued for the first/second Policy Year will be credited at the end of the first/second Policy Year as the case may be and will be available for any claims made in the subsequent Policy Year [Source 4, Source 5]. If an individual policy is renewed as a floater policy, the lowest cumulative bonus among all insured persons will be carried forward [Source 5]. If a floater policy is split into individual policies upon renewal, the cumulative bonus is apportioned based on the proportion of the Annual Sum Insured of each renewed policy [Source 5].
